PROFILE

Senior Software Engineer with 8+ years of experience designing and building scalable micro-services and cloud-native systems. Strong background in Node.js, AWS, and event-driven architectures. Passionate about clean code and product-focused development.

EDUCATION

M.Sc. in Software Engineering

Universidad Tecnológica Nacional, Córdoba, Argentina, 2016

PROFESSIONAL EXPERIENCE

Senior Software Engineer, Ryz Labs (Remote)

Jul 2024 — Present

- Developing scalable AI-managed phone call automation
- Working with AWS Amplify, Node.js, TypeScript, NestJs, Python, React

Senior Backend Engineer, The Sandbox Game; Paris, FR (Remote)

March 2023 — Apr 2024

- Developed and maintained RESTful APIs for the game's marketplace and asset claiming features (Coins & NFTs)
- Worked on a monolithic architecture with macro-services connected via RPC using Node.js and NestJS
- Integrated with a Layer 2 blockchain service to validate and manage asset transactions securely

Senior Backend Engineer, Protégé; Chicago, US (Remote)

Jun 2021 — March 2023

- Architected full backend platform including GraphQL & REST APIs
- Built and deployed infrastructure using the Serverless Framework
- Led integration of third-party services (payments, analytics, email)
- Used AWS Lambda, EventBridge, S3, PostgreSQL, Redis, GH Actions

Senior Backend Engineer, White Prompt; New York, US (Remote)

Aug 2020 — Jun 2021

- Sole backend engineer for new gambling app
- Delivered backend APIs using Node.js, GraphQL, PostgreSQL
- Implemented backend services and AWS resources with the Serverless Framework

Senior Backend Engineer, Rappi; Colombia (Remote)

May 2020 — Aug 2020

- Contributed to backend micro-services architecture
- Developed features and integrations using Node.js, Go, PostgreSQL and Docker
- Handled asynchronous data flows using Kafka

Software Engineer, ID90 Travel; Córdoba, Argentina

Sep 2016 — May 2020

- Designed and developed micro-services for a travel tech platform
- Built communication interfaces (SOAP & REST) with global hotel reservation systems
- Led development of the company's internal payment gateway system
- Contributed to cross-stack features using Node.js, PHP, Angular, GraphQL, Ionic, Redis, RabbitMQ, and MySQL

Full stack developer, Firma Visual; Córdoba, Argentina

Feb 2014 — Oct 2014

- Developed custom web applications for client management and internal tools using PHP, JavaScript, and MySQL
- Collaborated with designers to translate client needs into user-friendly front-end components

Full stack developer, Dequo Web solutions; Córdoba, Argentina

Nov 2012 — Feb 2014

- Built and maintained responsive websites and CMS features using PHP, HTML, CSS, JavaScript, and jQuery
- Worked closely with local businesses to develop tailored digital solutions
