EMPLOYMENT HISTORY

Senior Backend Engineer, The Sandbox Game; Paris, FR (Remote)

March 2023 — Present

Part of the Experience Squad in sandbox.game

Stack: NodeJS, Typescript, MySQL, Redis, Sequelize ORM, ExpressJS, AWS S3, Jenkins, GitHub Actions, Datalog.

Senior Backend Engineer, Protégé; Chicago, US (Remote)

Jun 2021 — March 2023

Built from scratch all the backend architecture of the protege.com system:
- Main GraphQL and REST API that provides services to web and iOS app
- Background and asynchronous processes
- Serverless event oriented architecture
- Internal admin tools CI settings for all the projects
- Several third parties services integration to manage payments, media storage and transformations, transactional emails, analytics events, push notifications, APM logs.

Stack: NodeJS, Typescript, PostgreSQL, Redis, Graphql, Type-graphql, Prisma ORM, ExpressJS, Jest, Golang, AWS (Lambda, EventBridge, API gateway, S3, ElasticCache, Cognito, Secrets Manager, CloudFormation, CloudWatch), Serverless, GitHub Actions, Vercel, Retool, Customer.io, Segment.

Senior Backend Engineer, White Prompt; New York, US (Remote)

Aug 2020 — Jun 2021

Worked as the unique Backend Engineer on an Agile team for a US based start up company, my duties consisted of building from scratch all the Backend services for a new mobile application released to the market

oriented to gambling services (bettoroff.com).

I was in charge from the development to the release of all the backend API and micro-services.

Stack: NodeJs, Typescript, GraphQL, REST, Express.js, Jest, PostgreSQL, Redis, Circle CI, Serverless, AWS (Lambda, S3, Cognito, Cloudwatch, EC2, ElastiCache, SQS).

Senior Backend Engineer, Rappi; Colombia (Remote)

May 2020 — Aug 2020

Back-end Engineer, working with micro-services architecture.

Stack: NodeJs, Go, Kafka, PostgreSQL, Docker.

Software Engineer, ID90 Travel; Córdoba, Argentina

Sep 2016 — May 2020

- Architecture and development of several micro-services
- Build many communication interfaces (SOAP and REST clients) with hotel reservation systems, such as Expedia, Priceline, Touricoholidays, Hotelbeds, Bonotel.
- Construction of the payment gateways system.

Stack: NodeJs, PHP, Typescript, Angular, GraphQL, Ionic, Ruby on Rails, MySQL, Redis, RabbitMQ.

Full stack developer, Firma visual; Córdoba, Argentina

Feb 2014 — Oct 2014

Development of several web applications, Customer management, analyzing and evaluating requirements for further implementations.

Stack: PHP, JavaScript, MySQL.

Full stack developer, Aequo Web solutions; Córdoba, Argentina

Nov 2012 — Feb 2014

Stack: PHP, MySQL , HTML, JavaScript, JQuery.
